Then he commands her to start growing and immediately she does grow and her little body is seen to just stretch out right before the eyes of the audience. This process is kept up until she reaches a height of say ten to 15 inches above her average—then again that magician—the wonder worker of the day, commands her to stop and under his power and guidance the process retards and she slowly goes back to her natural self. Now, remember, there are no covers used, no boxes or screens—you can see the girl standing right before the audience all the time. Really something new and it cannot be appreciated until seen in actual performance. You will never invest three times the price we are asking in any illusion and get the effect you will from The Girl That Grows, the wonder of the 20th Century. Price in shipping case, with full instructions, lecture and finest apparatus all put up ready to operate, \$40.00. You can use and present the illusion ten minutes after you get it and it only requires one human girl.

Here again we offer an illusion which can be used on any stage or platform with great success. A young lady steps upon a table and then is covered by the performer. No sooner is she covered—her form standing rigidly on the table—the performer shoots and Bang! she has gone, the cloth dropping to the floor and may be thrown out into the audience to prove nothing contained therein. The girl appears in another illusion or may come walking into the theater at the report of the gun. Very sensational and well worth being in the repertoire of any magician, big and small. A marvelous creation which will go well in any combination with other illusions of producing and vanishing a lady. Price complete, including the finest workmanship, apparatus and full instructions, **\$125.00.** We also supply a dandy shipping crate. Outfit is light and will not take up much room,

The "X-Ray Eye" Act

We offer you for the first time the only genuine secret and outfit for producing this act that has startled so many audiences throughout the world. Only two acts now working in vaudeville with this routine, makes a wonderful opportunity for any performer. Here is the effect. Lecturer enters, gives introductory talk about the remarkable eyes possessed by the young lady demonstrator, or it may be a man. He or she now enters and a wad of cotton is placed over each eye, completely shutting off sight; this is held in place by strips of half inch adhesive tape. Over this is tightly tied a heavy bandage or blind. Despite the secure binding, the girl carries out various tests, showing an ability to see through all obstacles. She dances around the stage, picks out colors, names cards and many other tests, finally going into audience and describing people therein or objects handed her. On removal of blinds they are tossed into audience. Explicit instructions and drawings making all plain, and above all a forceful and convincing lecture, making the demonstration interesting and instructive. All details are covered. Worked any place, drawing room, ballyhoo, carnivals, stage, etc. A real bargain in a complete act that we are pleased to offer our customers. Price complete, \$5.00.

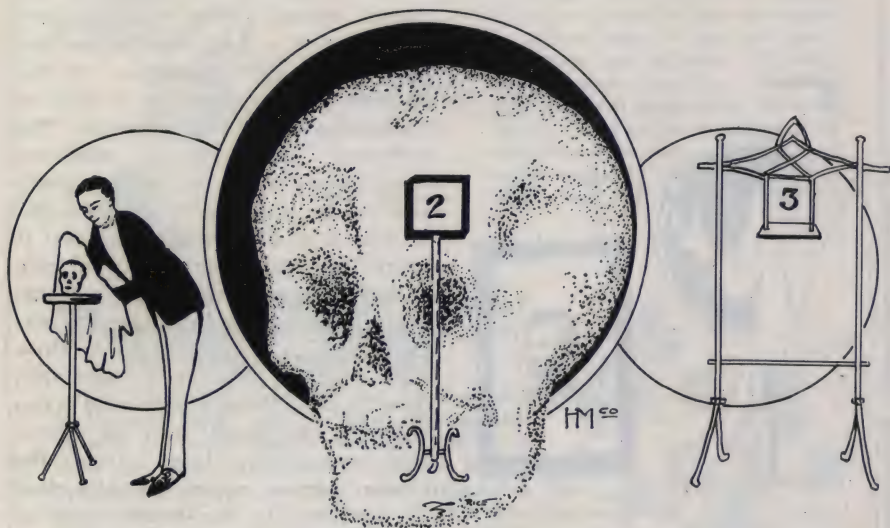

PHANTOM ILLUSION EXTRAORDINARY

Scientific, Mystifying, Amusing

An illusion of the modern day. Nothing on the American stage to compare with this master version of the beautiful Floating Lady Illusion. We furnish a beautiful elaborate outfit with which any performer can produce the illusion after reading the thorough instructions accompanying same. The effect of our Phantom is the hypnotising of a young lady and the assistants of the magician place her on a board, rather than leave her pretty body exposed to the audience the performer covers her over. Then under his mesmeric passes he causes the lady to rise in the air and float about with a freedom that will make the audience gasp. The performer passes a solid hoop over the floating body and proves that there are no connections of any kind. Attention is called to the Floating Lady and the audience is requested to "watch closely" then he suddenly jerks the cloth from the floating lady and like a flash she vanishes, only to reappear elsewhere or in some other illusion. Do not compare this beautiful outfit with any inferior grade. We furnish something that is superior and brand new in working method. Never before offered and if you are a magician and want a real production be sure to order Phantom. A creation of modern science. When placing an order we will not make you wait weeks—we can ship the same day that we receive your order and we guarantee the practicability of this great illusion. Can be worked successfully on stage or in a sideshow. Price complete, including a fine theatrical shipping crate, \$125.00.

The Wonderful Skull Illusion

Another brand new effect, the first time offered in any magical catalog. Read over the effect carefully and note its weird phenomena. On the stage are placed a beautiful nickle table, an elegant trapeze and a gorgeous glass casket isolated on a high nickeled stand. Performer introduces a skull and places it on top of the table and then covers it with a pretty cloth, taking both away from table and down near the audience. He throws the cloth and skull into the air, the cloth falling to the floor, while the skull having vanished, much to the amazement of the audience the **SKULL APPEARS** in the empty glass casket on stand. Now here is the subtle move of the illusion. The performer again takes skull from casket where it vanishes again only to appear on the swinging trapeze. Here is an illusion of great effect. Your spectators will carry home the impression of that mysterious skull. It is an experiment that few have seen and magicians claim it to be the coming sensation. Get the complete outfit while it is new. We only furnish the very best finished material, a credit to any stage. Full instructions and patter furnished with the beautiful outfit. Price, \$35.00.

Heaney's Great Spirit Picture Outfit—Read This Carefully!

There have been spirit picture outfits offered before, but not until we placed this great version into our catalog were they successful. No imitations can come within a nitch of comparing to our great illusion. The performer introduces a handsome large frame which he shows freely and can be seen clearly through, this he places on a splendid easel that is magnificent in construction, but still is void of suspicious looking apparatus. Taking a piece of paper the magician rolls it and places same into a tube which is held by a spectator. Now he asks for any picture to materialize in the frame, after the spectators have made their choice, the chosen picture appears like a flash of lightning in the frame—and on both sides of the frame appears two beautiful flags. The smaller illustration will give you an idea of this beautiful outfit. If you want a real feature for your program we highly recommend this spirit painting effect. Only the best apparatus furnished with full instructions, beautifully made throughout. Price, complete, \$60.00.

New Improved Die Box Illusion.

The Conjurer shows an elegant looking box with two divisions, which is standing temporarily on a table. He asks for the loan of a bowler or opera hat from the audience. It is now stood on a chair or table. The Conjurer now takes the Die Box, opens it and takes out an elegant Die. He pushes it back again, shuts all the

four doors, and immediately opens one division, asserting that the Die has disappeared. He shuts the division, tips the box on one side, and opens the other division showing this to be empty. Suddenly catching sight of the spectators laughing, suspicious that the Die is in the other division he again tips it, as though it had slid down, and makes the observation; "You really think Ladies and Gentlemen that the Die is still in the other division, such is not the case. I will open the division". He tilts the box again, by this means causing a noise. He opens one division and shows that the Die is not inside, but the spectators again laugh as they heard the noise, and from all sides the spectators shout "Open both

the doors". Now the Conjurer pretends not to hear, but as they persist eventually he agrees to do so. He opens both the front doors first and then the back doors convincing the audience that there is absolutely nothing inside. Now taking the hat which has previously been shown empty, he tips out the Die. We would specially mention that our Die Box is made of the finest Mahogany and that all parts are solidly constructed. 1181.**The Latest Ink Illusion.**

We have at last something new in liquid experiments. This experiment will be greatly appreciated by the public. You have here an ink illusion that does not require any special table, chemical liquid, draining apparatus, mirrors or pulls etc. Impossible as it may seem this trick may be performed anywhere, and even with the jug uncovered and visible on all sides. The presentation is as follows:

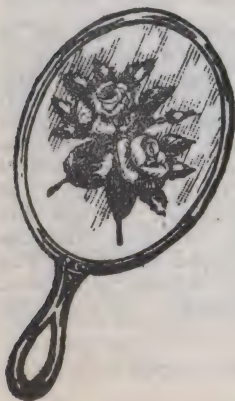

The Conjurer walks on the stage with a glass jug filled with ink. He proves that it contains ink by pouring some into a glass and dipping a piece of paper in and colouring it. The ink he pours back in the jug from the glass. He now borrows two handkerchiefs from the audience. One he spreads over the table to prove that nothing can go through. He now takes an unprepared glass and covers it with the second handkerchief. Over this he places an ordinary hat. The jug and contents are stood on top of hat. At the command of the Conjurer the audience see the ink getting gradually less and less in the jug, until only a small drop remains. The handkerchief and glass are now removed from the hat and to the great astonishment of the audience the glass is seen to be filled with ink. To prove that the liquid is really in the glass, he empties it into a second glass. The Conjurer is not bound to use ink; he can use milk, wine, etc. or anything he may wish. This startling trick can be shown as a real experiment in liquids. The working is very simple making this a very successful trick.

The Conjuror fires a pistol and in an instant the front and back of the box fall apart, and the spectators can see the inside is empty. The dove that was placed inside has vanished. At the same time the dove appears in the uncovered cage that the assistant is holding. This trick is a first class effective trick and comes finished in finest style, and carefully packed.

The New Flag Trophy.

The Conjurer produces from a tissue paper bag a very small flag which drops to the ground. Suddenly there appears in his hands a number of larger flags, which he spreads out and holds in his left hand. Following this there appear three large flags, each one being larger than those he already holds. This forms a tableau of magnificent splendour. Finally a gigantic flag appears.

In this we have the best of all flag productions. The preference for this production over all others is this; The number of flags, 60 in all, made of silk and including flags of all nations. They roll up so compact, lighter and smaller than all others, and are quickly unrolled.

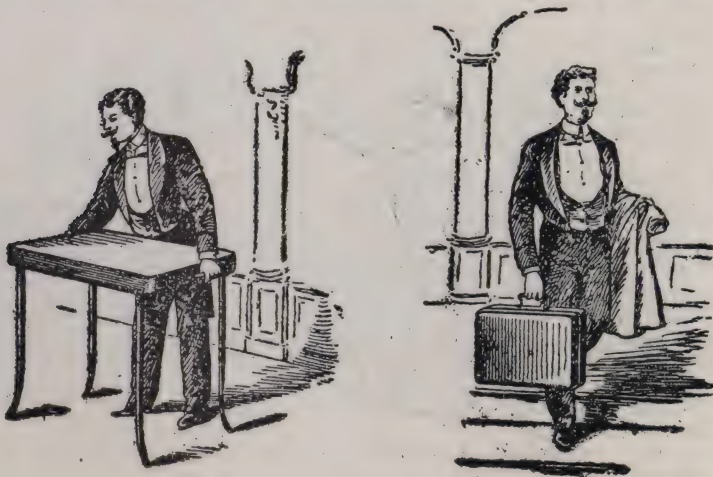

They have reached a perfection in manufacture that no others have yet been able to attain.

1207. The Wonderful Flying Lamp.

The Conjuror covers a lighted lamp, that is standing on a small tray, with a transparent cloth. Taking the lamp off the tray he goes down amongst the audience with it. The audience can see the flame of the lamp shining through the cloth, yet suddenly he throws the cloth in the air, the lamp instantly disappearing.

With this unique lamp the Conjuror can cause it to disappear even whilst surrounded by an audience. The working is extremely easy and there is no danger whatever of fire. Lastly with this lamp there is no need

to go near any mirrors tables servantes or other objects. Also there is no danger with this lamp, as in others in which there is a lot of complicated mechanism, of it refusing to work. The mechanism is so simple that it is impossible for it to fail.

Another feature of this lamp is that it packs up so small as to go into a small handbag.

Every Conjuror should include this wonderful effect in his programme as the effect obtained by this Flying Lamp has never previously been attained by any other.

1239. **The Disappearing Lamp. „Heureka“.**

One of the finest tricks in the world of magic has been the experiment in which a lighted lamp disappears. In the last few years several methods have been placed on the market but they have all been more or less failures. Either the Conjurer had to have an accomplice or else a special bulky table. In no case was it worth the price. We believe that our customers will find this to be everything that we claim. This disappearing lamp is simple in construction, very light in packing, requires no assistant, and is indelectable by the audience. It will produce a great effect. The effect of the trick is as follows ; The Conjurer shows a lighted lamp, covers it with a sheet of tissue paper and places it on a stand. He holds the stand high and goes amongst the audience. At the word of command the lamp suddenly vanishes under the paper and the latter falls to the ground, whilst the Conjurer shows the stand empty. There is no need to emphasise the fact that the Conjurer will receive great applause. Notice once again that this lamp is different to all others. Small and light for packing, it all takes to pieces and takes up very little room. \$65.00

1255. The Mysterious Card and Watch Frame.

On the stage on a side table is standing an elegant nickel plated frame as illustrated. The Conjuror borrows a watch from a member of the audience, and also allows someone to select a card from an ordinary pack. This card is torn up into little pieces and someone requested to hold one corner. As he takes back the torn pieces of card, the borrowed watch falls on the ground and breaks into a number of pieces. The Conjuror apologises explaining that it was an accident, and could not be helped. Naturally the person from whom it was borrowed does not look very cheerful. To get over the predicament the Conjuror collects the broken pieces of the watch and stuffs them into a pistol tube, and offers them to the owner. Naturally he declines them, so the Conjuror having nowhere to put them for the moment, fires them at the frame. The Conjuror next takes

the pieces of card, places these in an ordinary pistol points it at the frame and fires it. Immediately the chosen card appears in the frame with the exception of one corner which a spectator is holding. Taking this corner the Conjuror throws it and immediately the card becomes whole. But the trick is not yet finished; Where has the watch got to. He commands the card to walk out of the frame and the watch to take its place. The pistol is again fired and the change quickly takes place. The card is now on top of the frame and the watch hangs in the centre. Both are now taken out of the frame and given back to the spectators. We supply the frame all parts of which are of the highest class of manufacture, with mechanism which cannot fail, complete with full instructions, so that this trick will become an ornament to anybodys programme, no matter how good it may be. \$ 25.00

1256. „Duplex“, The Magic Chair.

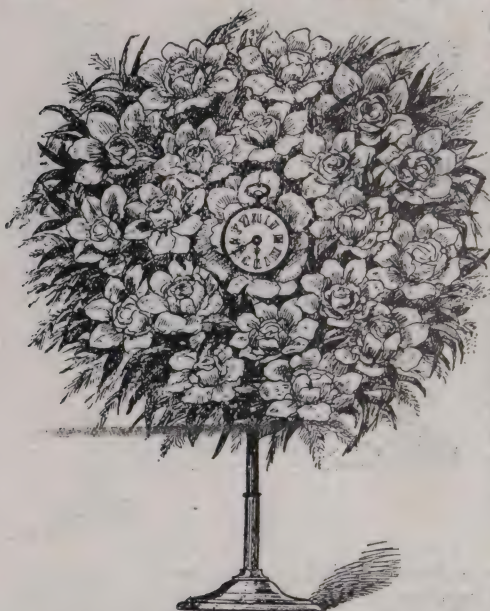

The Conjuror requests two gentlemen from the audience to come on the stage and assist him in performing a trick. He requests them to take a seat. There only happens to be one chair on the stage, so whilst one of the gentlemen sit down the other one looks around for another chair. Failing to find one he draws the Conjurers attention to the fact that he cannot sit down, as there is only one chair. The Conjuror asks the gentleman who is seated to stand up for one moment. Seizing the chair on which he was sitting, he swings it round in the air, and suddenly he has two chairs in his hand.

Both the gentlemen are now able to sit down, and the Conjuror is able to proceed with his trick.

With this original opening to his programme, the Conjuror is sure to make a great impression on his audience. \$ 25.00

At this very moment the closed bouquet commences to open very slowly. The blossoms unfolding until the whole presents a picture of undescrivable beauty. We would expressly remark that on no account is the watch exchanged for a duplicate, and that the trick can be performed without any assistance. "Botania".**The Finest Flower Growing Trick in Existence.**

Until now both Amateur and Professional Conjurors have had enormous difficulties to overcome, when working the beautiful flower growing trick in which you show an empty flower pot, and a Rose Bush suddenly appears therein. The Conjuror has always required servantes, pedestals, etc etc. With this trick all these helps are self contained. The great advantage of "Botania" is that unaided by any of these accessories, and even surrounded by an audience this effect can be obtained. Besides this the bouquet is much larger than that formerly constructed. The working is quite simple, requiring no practise whatever, and it always operates like lightning. The effect is absolutely undescrivable.

Method of presentation.

The Conjuror shows an elegant empty flower pot, also a decorated cover. He shows the inside of the cover and to prove that it is absolutely empty places his arm right through. Now without moving a step, or going anywhere near his body, he places the cover on the flower pot, which right up till this moment has been in full view of the audience. Immediately on lifting the cover he discloses to view a most beautiful flower bouquet, which glows with gorgeous colours.

This bouquet has the appearance of being twice and even three times the size of the cover, both in height and wide. Owing to this the effect will prove a complete mystery to any audience. The weight of the trick complete is Lbs. Nett. The trick can be performed anywhere. Concert Hall, Drawing Room, Stage, Circus, etc. We can thoroughly recommend this new Flower Growing illusion to every Amateur or Professional Conjuror as being absolutely infallible.

2930.**Ten-Ichi's Great Water Act.**

This sensational number which the well known Ten-Ichi Troupe have made famous in all parts, has up to the present been very little copied. We have at last resolved to place this number on the market, and thus make it accessible to the European Conjuror. We would expressly emphasise the fact that this is not an inferior copy, but the act in its entirety suitable for an illusionist. It will prove practicable, and the mechanical part is exactly similar to that of the original. Every part of this act is made in our own factory with special machinery and is guaranteed to work perfectly without fail. Every Conjuror who is looking for something New and puzzling for his programme cannot pay too much attention to this act.

We would remark that there is not at any time a great quantity of water to handle, and all is so arranged that both before and after the act, another turn can immediately come on. Time of playing this act 8 to 12 minutes as desired. Without wearisomeness owing to the number of charming variations possible.

Effect of Act.

On the stage visible from all sides, stands a platform with a footstool on and various small utensils. The Conjuror in oriental costume steps on the stage ascends the platform and sits in the stool. He now takes a sword from the stand that is on the platform, shows that it is sharp by taking a piece of paper and snicking it in two, and he then lays it back on the stand. Now he takes a nickel plated tea kettle, sets this on an ornamental nickel plated tripod which is already standing on an oriental stool, he now takes a glass of water and empties this into the tea kettle. Now the Conjuror siezes a fan and fans himself, then folds it up and holds it in the left hand. In his right hand he takes a wand. At the

command of the Conjuror a stream of water commences to rise from the tea kettle, higher and higher moving in correct time to the wand, rising, lowering, backwards and forwards as desired. Suddenly the Conjuror takes the stream of water from the kettle with his wand. The stream has disappeared from the kettle and is now on the wand. He carries the stream [always being seated] with the wand, from kettle to sword. Now he takes the stream from the sword with his fan, the stream of water remaining on the fan. Now begins a splendid series of changes with the stream of water between fan and wand. A going and coming, a giving and taking, a throwing of snakelike streams etc etc. From the start to the finish the Conjuror sits on the stool, producing merry fountains from the wand and the kettle.

At this moment the assistant comes on the stage and going up to the platform takes the stream of water on his hand, from the kettle, and carries it round the stage, shows the audience and then goes off with it. The Conjuror has now no stream of water springing up, and is quite astonished over it. He calls the assistant back but as he does not come, he takes a second glass of water and empties into the kettle, when like a miracle a stream of water appears on the end of his wand. The play now begins afresh only with increased variations. Quickly the Conjuror produces the stream from the fan from the wand, from fan to sword and back again. Suddenly the Conjuror has two streams of water, and small figure play goes on between the wand and fan. Very prettily the two streams become four. Out of the kettle, wand, fan and sword in four high streams splashes the water on to the bottom of the platform. A few magic words muttered by the Conjuror and all the water has disappeared.

Now begins the third variation.

On the kettle again showing a stream of water, the assistant walks on and approaches the kettle, apparently to take the stream, but the Conjuror this time is as quick as his assistant, and takes the stream on the end of his fan. The assistant now remains standing near the platform. The Conjuror now passes the stream from his fan on to the head of his assistant. The assistant takes the stream from his head, swings it round and then puts it back again. The Conjuror now cuts it off with his wand, and continues the play repeatedly with a second assistant who comes in. Now the Conjuror takes the stream back again, places it on the assistants hand, then changes it on to the other assistants and so on backwards and forwards. When a second assistant is not available, this effect takes place between the Conjuror and the assistant. The assistant now goes off with the stream on his hand. Now the Conjuror stands and from the platform on which he is standing streams appear, also from the fan, wand, kettle, from the kettle three separate fountains, and from the sword ten streams, Laying the fan and wand on the stool these disappear into the fountain. The Conjuror steps from the platform, produces the water on his hand, bows and goes off.

2953.

The Golem. An Ideal Illusion.

What Professional Conjurer or Showman that has not been on the lookout for years for an illusion that could be worked on the variety halls, or in the circus, that did not need traps, mirrors, or other similar aids, and which had such a great effect that the audience invariably said that it must be a miracle.

We will give a short description of the effect of our illusion, which you will agree is in a class entirely on its own. We can recommend it on our own knowledge, as being the best, and up to the present nothing like it has ever appeared on the market.

In the centre of the stage or ring stands a tall beautifully gilded four sided cabinet, as illustration, with four doors showing and with four carved feet. On the top of the cabinet is the bust of a Sphinx. The Conjurer with one or two words, introduces the cabinet, and then opens the four doors, showing right through. The spectators can see right through the cabinet from front to back, at the same time the Conjurer takes a stick and pushes this right through, and also underneath, whilst he slowly turns the cabinet round so that the spectators can see right through from all sides. Having convinced the audience that no one is concealed inside, the doors are closed and attention drawn to the clockwork, fixed in the front of the cabinet. This is set in motion, so that the spectators can see the mechanism working, also a pair of electric lamps light up so that every thing can be distinguished clearly. Now with a quick jerky movement a pair of arms

emerge out of the bust of the sphinx, apparently being worked by the mechanism of the clockwork which can be plainly seen in motion.

The fingers on the arms are spread wide apart, so that everybody can see that the hands are perfectly empty. The hands come very slowly together, and with a continual movement of the arms there appears suddenly in the hands a silk handkerchief. The Conjuror shows this and then places it back in the hands. Again the hands and arms commence to move jerkily, when suddenly there appears under cover of the handkerchief, a very pretty flower bouquet, in the hands of the sphinx. The Conjuror takes the bouquet, shows it and then lays it on the table, meanwhile the hands vanish the handkerchief and produce in its place an egg which the Conjuror also shows. The arms now remain still whilst the Conjuror shows an ordinary drum, which he hooks on to the cabinet. He now places two drum sticks in the hands of the sphinx. As soon as the Conjuror starts the mechanism, which has stopped, the hands come to life. Very slowly at first, beating time on the drum. Now quickening to the music, but always in time. As the piece of music finishes the hands slowly stop. The Conjuror takes the drum and drumsticks away, and the hands slowly draw back into the bust and disappear. The Conjuror now takes the sphinx bust off the cabinet and shows it to be empty. In place of the sphinx bust he now puts a four cornered frame. On the front of the frame is seen a small piece of clockwork which the Conjuror regulates and adjusts to the larger clockwork in the cabinet. An ordinary Guitar is now shown and stood in front of the frame. Now jerkily out of the frame come a pair of hands and commence to play on the Guitar. So that the audience can be assured that the cabinet does not contain any possible being of any description, the Conjuror opens all the doors and slowly turns the cabinet round. Everybody seeing that the cabinet is absolutely empty. As soon as the cabinet has returned to its original position the arms slowly commence to go back into the frame. The frame is now taken and shown all round, also the guitar. The Conjuror now shows a second screen, folds this together, and then opens it and places it on top of the cabinet. On the front of the frame is an oval flap which the Conjuror folds down, whereupon a lady's head appears in the opening. Now the cabinet is turned round and shown empty. The flap in the frame is now closed and the Conjuror announces to the audience that he will explain the whole mystery. He now takes the last frame off, shows this to be perfectly empty, then turns the opened cabinet slowly round, so that everybody can see the inside to be perfectly empty. To prove to the audience that they can really see right through the cabinet the Conjuror takes a stick and pokes it in all directions through the cabinet. The Conjuror now says, that seeing that there is nothing inside the cabinet with the exception of the clockwork, he feels sure that it is no longer a mystery to them. With that he makes his exit to prolonged applause.

361 A. „Lilliput” The Vest Pocket Candle Case.

This small marvellous novelty is recommended to everybody for Drawing Room work. It is a small ornamental candle case, highly nickel plated, and just holds a burning candle, which is placed inside and disappears, leaving in its place a cigarette, which can at once be handed to the spectators.

Instead of the cigarette another article can be produced. This small case can be examined beforehand if necessary. A handsome combination with No. 361. in our Catalogue, „The Latest Cigarette Tube”. This is without doubt the neatest thing of its kind and defies competition. \$2.00

362. The 20th. Century Handkerchief Tube. The Ghost Tube.

This handkerchief tube is a recent addition to the realms of modern magic. The tube can be shown all round. The ends are now closed with some tissue paper, and two rings that just fit over. The wonder of this new handkerchief tube is this, that a light or a match may now be held behind it, and the spectators can see right through it, proving nothing to be inside. The Conjurer now vanishes a handkerchief, the paper bands are broken, and in the tube is found the vanished handkerchief.

Numerous combinations will undoubtedly present themselves.

The Dutch Illusionist Herr Van Houten, wrote about this tube in the following words: „The handkerchief tube is handsome. The idea contained therein is wonderful. The student can reflect on this dream of a miracle. This trick is truly an ornament to magic.”

362 A. Flora's Wonder Tube.

The Conjurer shows a highly nickel plated tube to be perfectly empty. Then with a piece of tissue paper and two nickel plated rings he closes the ends. He now holds the tube in front of a lamp or candle so that the audience can see there is still nothing inside. Now breaking the tissue paper he produces out of the tube a dozen magnificent feather flowers, which he throws on the table or floor where they stand upright. This magnificent trick will always fetch great applause. We would mention that the Conjurer works with sleeves rolled up, no servante is used, and that the tube does not go near any object. This is independent of any other piece of apparatus or feke, and to sum up is a „miracle of the age”. Instead of flowers the Conjurer can produce handkerchiefs flags or other objects from the tube. \$2.50

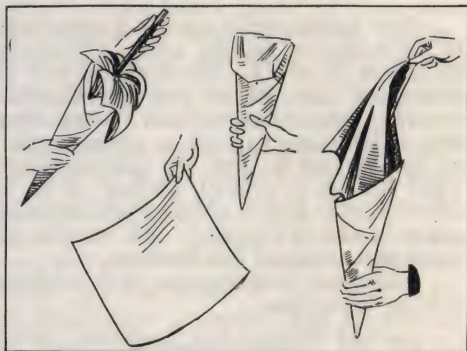

No. 36B. The Mysterious Flight from Glass-Cylinder

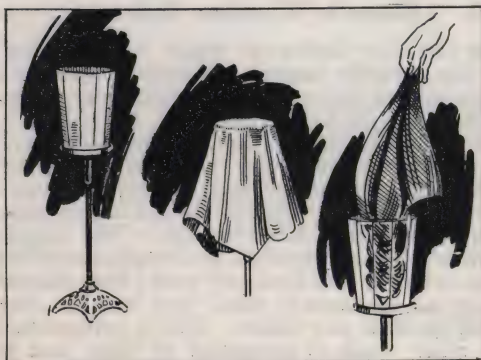

Here is an effect that will puzzle magicians. Into a glass cylinder is first placed a red silk handkerchief well into the center where it can be seen, into each end is placed a green silk which completely then encloses the red silk. However, as quick as a flash and amidst the audience the red silk vanishes from the cylinder, leaving just the two green silks on either end. At once he hands the cylinder (how about you wise ones) to the audience who carefully remove the two green silks from same. Really a remarkable feature in any act. Price complete \$3.50.

No. 37B. The Flying Handkerchief

Forming a cone from a newspaper the performer gives it to a spectator to hold, another cone is formed in the same manner, but a handkerchief is dropped into same. It is turned over at the top and given to a spectator to hold. A change is commanded to take place, the handkerchief to vanish from one cone and to appear in the previously empty paper cone. At once the members of the audience holding the cones are requested to open them and much to their amazement the magic change has taken place. Finest apparatus, \$2.25.

Just Out! 33 Rope Ties and Chain Releases

A REALLY wonderful book containing actually thirty-five such releases. The first real and intimate expose of the whole art of Rope Manipulation by one who is conceded to know more about the subject than any other man living.

"Thirty-five Rope and Chain Releases! Why there have never been more than ten or twelve such tricks," you will say. True, but this does not take into consideration the remarkable number of **NEW TRICKS AND TIES INVENTED BY THE AUTHOR** who explains them for the first time. When the man who has purchased and studied everything obtainable on this subject reads this book, it gradually dawns upon him that he has been only a neophyte in the real secrets of Rope Tying which are so clearly explained here.

It shows how to give a Complete Act of Rope and Chain Releases, more sensational and interesting and far more convincing than handcuffs, for the audience, can furnish the chains and ropes—and less expensive. It tells how to handle the committee; make them play right into your hands repeatedly; also that like in the **SUCKER DIE BOX**, they are helping you, most when they think they are trapping you. And it always "brings the house down" when you turn the tables on a man from the audience. Explains the ropes to use, the lecture, and the arguments, and dozens of new ties, etc., including the tying of the performer in 75 feet of rope by five members of the audience (no confederates), and his quick release.
